TO WHOM IT MAY CONCERN

By the present we wish to express our full satisfaction to the yachts repair company **ALPHA Τεχνική Επισκευαστική Σκαφών Ε.Π.Ε** which performed an excellent repair job – quality, coordination, time schedule, administration – on our s/y AESOP, Oceanis 473 during the period 7th April – 24th April 2009 in the Kalamaki marina boatyard.

Repairs works included an extensive side shell damage (GRP) requiring mould model of the damaged part, extensive wood work on teak deck, toe rail and furniture, upholstery inside, as well as rebuilding and refitting of extensive stainless steel structures for pulpits, stanchions and bimini.

This company has shown excellent organization, coordination with their subcontractors and competency, with competent people at all level.

The present is issued at our own initiative and will.

We wish a fruitful activity and all the best to this company!

Made in Athens on the 15th May 2009.
